Professional Summary

Results-driven Junior Frontend & Backend Developer with deep expertise in designing and delivering scalable, high-performance software solutions using .NET and ASP.NET. Proficient in JavaScript, and TypeScript testing with Playwright Automation, with additional experience in firebase Known for building clean, secure, and reliable backend architectures, optimizing system performance, and solving complex real-world problems in production environments.

Education

Diploma in Computer Engineering

Cape Peninsula University of Technology, South Africa — *Graduated 2023*

Relevant Coursework: Computer Networks, Operating Systems, Database Management, Data Structures & Algorithms, Computer Hardware & Maintenance, Programming in Python and SQL, Systems Analysis & Design

Full Stack Software Development Certificate

Codeeza — *Graduated 2023*

1. Technical Skills

- C# (object-oriented design, backend services, LINQ)
 - .NET / .NET Core (scalable backend architecture, Web APIs)
 - ASP.NET / ASP.NET Core (MVC, RESTful services, authentication)
 - Entity Framework (ORM, migrations, performance tuning)
 - SQL (schema design, query optimization, indexing)
 - HTML5, CSS3, JavaScript (ES6+, modular architecture)
 - PHP (REST APIs, backend services)
 - Next.js (App Router, SSR/SSG, API routes)
 - Tailwind CSS (design systems, responsive layouts)
 - UI/UX (Figma-ready thinking, accessibility, mobile-first design)
 - Playwright (end-to-end testing, UI automation, cross-browser testing)
 - Process Automation & Workflow Optimization
 - Data Cleaning & Transformation pipelines
 - Analytics Dashboard Development
 - AI-assisted development workflows
-

Work Experience

- CoreAI(2020-2022) Automation Engineer — Playwright Testing
I worked as an Automation Engineer specializing in end-to-end (E2E) testing using Playwright to ensure high-quality, reliable web applications. Designed and maintained scalable automated test frameworks, improving test coverage, reducing manual testing effort, and accelerating release cycles.

•

- Junior Software Developer Profaster /Media Cape Town, Jan 2023 – Dec 2023

1. Deployed websites using Netlify and shared hosting services

2. Designed and developed responsive websites using HTML5, CSS3, and JavaScript
3. developed automated Excel models
4. Calculations and financial forecasting.
5. Supported the enhancement of customer pricing models, reducing errors by
6. management insights.
7. Conducted research on electricity market trends to guide pricing strategies.
8. Created interactive dashboards using Power BI and Tableau for
9. Automated data management processes, improving data integrity and accessibility

- Junior Software Developer Freelance/IT Support

1. Maintained and updated existing websites based on client requirement
2. Assisted clients with website setup, domain configuration, and basic SEO

- AWS Apprenticeship (2024-2025)

- Cloud Architecture & Deployment (EC2, S3, RDS, VPC, Load Balancing)
- Automation & DevOps (CloudFormation, CI/CD pipelines, Terraform basics)
- Programming & Scripting (C, DB, Java)
- Cloud Security & Compliance (IAM, encryption, monitoring)
- Problem-Solving & Troubleshooting (performance optimization)

Projects

1. Fully responsive design for mobile and desktop
2. Deployed a portfolio web application on **AWS EC2** with **S3 for storage**, **RDS**
3. Food Ordering Web Application
4. Created a personal portfolio showcasing projects and skills and Websites
5. Deployed using GitHub Pages / Netlify

Additional Information

Strong willingness to learn and adapt to new technologies

Good communication and teamwork skills

Available for internships, junior roles, and freelance projects
